

include/core/class
/Core_Class_error.hpp

```
graph TD; A["include/core/class  
/Core_Class_error.hpp"] --> B["exception"]; A --> C["string"];
```

The diagram illustrates a C++ header file's dependencies. A central box at the top contains the text 'include/core/class' followed by a line break and '/Core_Class_error.hpp'. Two blue arrows originate from the bottom of this box. One arrow points diagonally down and to the left to a box containing the word 'exception'. The other arrow points diagonally down and to the right to a box containing the word 'string'. This indicates that the 'Core_Class_error.hpp' header file includes the 'exception' and 'string' headers.

exception

string
